

New Insurance scheme offered by Berkeley Burke exclusively for SpeCC Registered Contractors

We are delighted to offer SpeCC Registered Contractors an exclusive new service – a market leading insurance product specifically designed for and only available to SpeCC Registered Contractors.

Historically, the Concrete Contractors insurance market has been restricted in terms of the number of insurers willing to cover the industry and as a result the premiums are considered high.

The basic problem has been that the Insurance Industry has not fully understood the business or fully appreciated the quality of the Companies that have secured SpeCC Registration.

Berkeley Burke has investigated the market to see if there was a solution.

Berkeley Burke is part of the Willis Network and has been responsible for Insuring highly complex programmes such as the White City Shopping Centre, St. Pancras Chambers Refurbishment and Oxford Castle – the conversion of a prison into a hotel and leisure area.

Our Report confirms that the appetite for our industry will remain difficult, but there is considerable interest in supplying a specialist insurance scheme for SpeCC Registered Contractors.

Hence we are please to offer preferential terms that are guaranteed to be more competitive than your existing premiums* .

* Guarantee does not apply to a subsidiary business, which is currently placed on a Head Office policy. The comparison must be on a like for like basis based on turnover and wage roll. Claims must be below 80% of the premiums. If turnover has increased, then a pro-rata rate will be formulated, thus offering the same percentage saving and maintaining our Guarantee.

Quotations will be exclusively available through Berkeley Burke, provided Companies hold current registration with SpeCC.

The importance of the SpeCC link is shown by the fact the Chief Executive of Berkeley Burke will deal with all enquiries personally.

The review will be highly professional and by its nature will involve providing full information including claims experience to Berkeley Burke.

A timescale will be agreed for completion of the review when a quotation is requested. The types of insurance available through the scheme are as follows:

Contract Works
Constructional Plant and Equipment
Employers Liability
Public Liability
Non Negligent Liability (21.2.1)
Professional Indemnity
Motor
Directors and Officers insurance
